Our focus is on the highest importance on Customer Satisfaction that is based on the quality products and timely delivery. Taking maximum advantage of group company, Direct dealership with the shipping companies, we deliver the products securely and speedy from our two factories located in two separate locations in the country. All operations are centralized by the head office situated in capital city of Colombo.

Why Use EcoSoil

ECO SOIL is ecological & economical solution for your agricultural/ horticultural products and green projects. Manufactured from the best quality coconuts in Sri Lanka, the ECO SOIL marks high water retaining capacity & air permeability, which are so important for the healthy growth of plants.

Excellent Stability

Coco peat is considered to be homogeneous and it is considered to be a very stable media for growing, Reptile Bedding, Roof Top Gardening. Being a good absorbent, dry coco peat can be used as an oil absorbent on slippery floors

100% Organic Product

Coco Peat is an organic product that is bio degradable and return to the soil without causing any impact to the environment. In urban gardening, used Coco Peat can be disposed with normal garbage and does not need special handling.

Selected Raw Material

Eco Soil Substrates has a very strong supply chain management system to have detailed information about the suppliers and the raw materials. All the raw materials are checked and controlled all throughout the collection and the production process.

Acidity and pH

Coco Peat has a Ph level from 5.5 to 6.5 and the Ec levels would range from 0.5 to 1.5 at the Ec meter. The Ec of the Coco Peat is controlled by both washing and mixing the material depending on the customer requirement.

Horticulture & Agriculture

We are manufacturing various type of Coir pith products, provide a growing media for plants. There are in high demand amongst hydroponics growers, green house, all type of Agriculture and Horticulture Industry.

EcoSoil for Gardning

EcoSoil offers different solutions not only for professionals also for consumers. Consumers can take profit of coco coir advantages for potting soil and gardening. And our product gives you to the choice of using an environmentally friendly growing media and that gives excellent results.

EcoSoil for Green Projects

Quality Coir fabrics and erosion control mats enhance sub-grade performance, prevent soil erosion and reinforce your Green Project at a fraction of the cost of traditional construction materials. And today, as storm water regulations and other industry mandates become ever-pressing issues, there are no products more dependable or cost-effective than Quality Coir.

EcoSoil for Animal Bedding

EcoSoil Animal Bedding is a comfortable and best suitable material for animal friendly bedding. It is ideal as bedding for as floor layer for animal sheds due to its moisture absorbing quality and soft bed cushioning effects. It is easy to lay and remove and free from dust particles. Coco Peat helps to keep your pets at best comfort levels and healthy.

EcoSoil for Absorbent

It can be used for both hazardous and non-hazardous spillage cleaning. Coco Peat is free from harmful dusts and it is biodegradable. The absorbed material can be Coir Composted and it is lightweight and spreads easily. It is easy to use and consumes very less time for cleaning and it benefits by less wasted man hours. Some of the spillages coco peat used are: •Fuel (Diesel & Petrol) •Mineral vegetable lubricants •Oils, Transmission fluids •Solvents •Cooking oils •Water based chemicals •Pesticides and Herbicides •Mild corrosives •Liquid organic waste
